Terror Attack in London, England

On 06/03/17 at 1456 hours, the California State Warning Center (CSWC) was notified by the STAC of a possible terrorist incident in London. Television news agencies and Twitter reported multiple incidents in London. Police stated that a van drove through a crowd of people on the London Bridge. A separate incident at a restaurant near the bridge incident occurred at roughly the same time. London Police are calling the incidents a terrorist attack. The STAC and CSWC will continue to monitor the incident. The STAC will provide updates as they become available.

Sunshine Gardens Drinking Water Possibly Compromised, South San Francisco, San Mateo County

On 06/02/17 at 2015 hours, the Cal OES Coastal Duty Officer (CDO) advised the California State Warning Center (CSWC) that the drinking water supply for Sunshine Gardens in South San Francisco, San Mateo County, was possibly compromised. At 1300 hours, it was noticed that the lock to the fence leading to the tank was cut and the tank had been spray painted.

- Cal Water has informed residents that they are able to resume using and drinking their household water.
- Tests came back negative for any contaminants.
- No need to continue to boil water.
- Cal Water will deliver signs around the impacted neighborhoods residences with this information.

Train Derailment, Bloomington, San Bernardino County

On 06/03/17 at 1425 hours, the CSWC was advised by Union Pacific Rail Road (UPRR) that a single railcar derailment occurred in the rail yard in Bloomington, San Bernardino County. The empty rail car derailed upright during yard operations due to unknown reasons. There were no hazardous materials released and no impacts to rail traffic. The investigation is ongoing. All notifications were made per SOP.

SITUATION SUMMARY

2017 Statewide Winter Storms

Cal OES Coastal Region

Paul's Slide, State Route 1, Monterey County

Per Cal OES Coastal Duty Officer (CDO), as of 1300 hours on 05/25/17, Paul's Slide on State Route 1 has been closed to all traffic.

- Caltrans engineers report slide activity and the area has been closed in the interest of public safety.
- Assessment will commence and further details will be provided once released.
- [State Route 1 opened briefly on 06/02/17 for locals and delivery access. Full closure resumed the evening of 06/02/17 through Tuesday 06/06/17 in the evening.](#)

Mud Creek Slide, State Route 1, Monterey County

The Mud Creek area on State Route 1 sustained a major slide on the evening of 05/20/17, when over a million tons of rock and dirt fell down the slope continuing down to the ocean floor 250 feet off the shoreline.

- The Mud Creek area is ¼ mile in length, made up of five slides, four of which fell during this single incident and consolidated into one slide. The remaining slide now extends 1,500 feet in length over State Route 1 and is about 35 to 40 feet deep.
- Roadwork at Mud Creek was suspended and heavy equipment removed last week due to the threat of new slides and for safety of highway workers. Caltrans geologists and engineers plan to assess it further when this area stabilizes.
- There is no estimate when this section of State Route 1, approximately nine miles north of the San Luis Obispo/Monterey County line will re-open.

Pfeiffer Bridge Incident, Monterey County

California Highway Patrol (CHP) and Caltrans had a hard closure on the Pfeiffer Bridge on HWY 1 at mile marker 45.52 (SB Sycamore Canyon and the Bridge) due to a crack in the bridge. The bridge has been demolished so the road is closed and estimates for some access from the north is late September 2017.

- Backup air medical transport plans have been developed for medical emergencies through Cal OES Law Enforcement Branch.
- All businesses north of the Pfeiffer Canyon Bridge closure are open to the public.

SITUATION SUMMARY

2017 Statewide Winter Storms

Cal OES Inland Region

River Forecast – The following river is forecast to meet or exceed Flood stage:

Mariposa County:

- Merced River at Pohono Bridge is forecast to exceed flood stage at 10.0 feet the morning of 06/03/17.
 - Western portion of North Pines Campground, located at the east end of Yosemite Valley between the confluence of the Merced River and Tenaya Creek, begins to flood. Water rises to the base of the swinging bridge downstream from Chapel Meadow.

River Forecast - The following rivers are forecast to meet or exceed Monitor Stage:

- Placer County: Truckee River at Truckee
- Alpine County: East Fork Carson River at Markleeville, West Fork Carson River at Woodfords

Please see link for River Forecast Guidance - <http://www.cnrfc.noaa.gov/>

Cal OES Southern Region

River Forecast - The following river is forecast to meet or exceed Flood stage:

Mono County:

- West Walker River at US 395 Below Little Walker is forecast to exceed flood stage at 6.0 feet the **evening** of 06/03/17.
 - Potential Impacts: Some minor flooding of lowlands, pastures, and rural roads.

Please see link for River Forecast Guidance - <http://www.cnrfc.noaa.gov/>

WEATHER SYNOPSIS BY REGION

NORTHERN CALIFORNIA

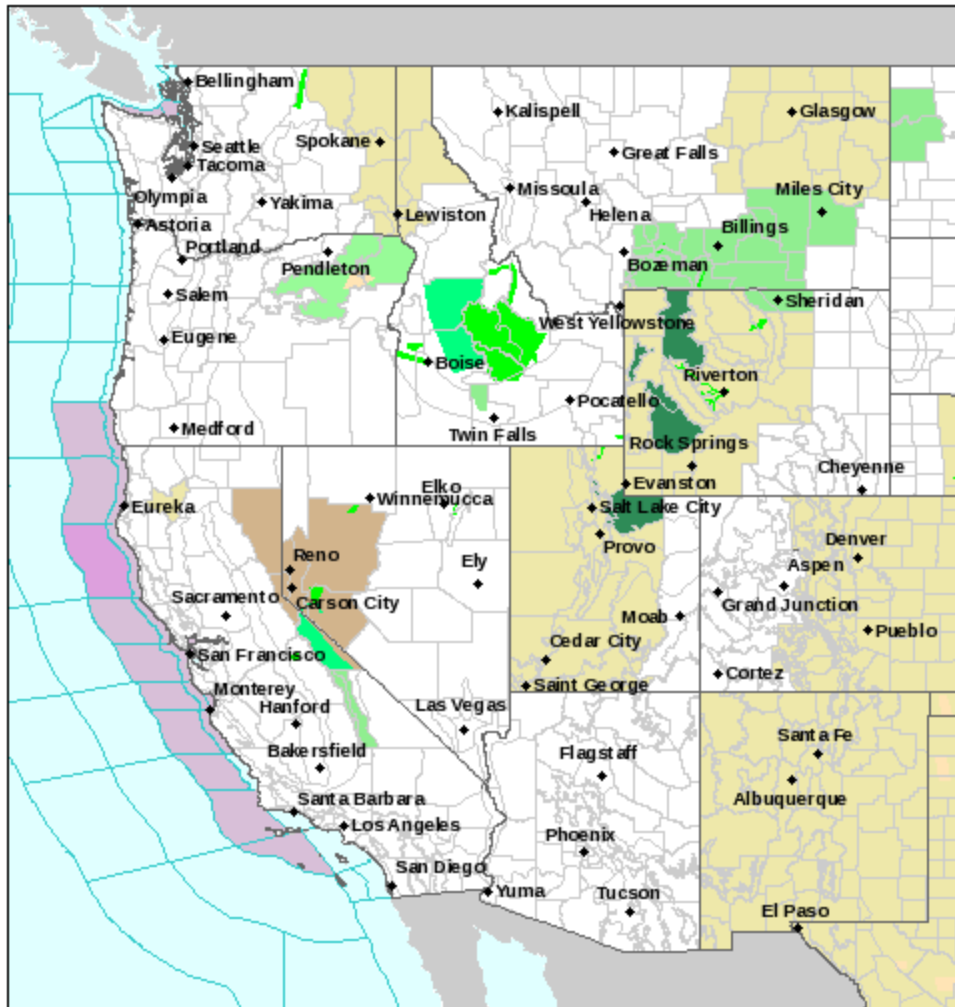

Warm and dry conditions continue today. A weak system passing to the north on Sunday will bring a little cooling. Warming with above normal temperatures and lower relative humidity expected Monday through mid week as high pressure rebuilds over the west. A stronger system will bring significant cooling towards the end of the week and even a threat of precipitation for parts of Northern California.

SOUTHERN CALIFORNIA

There will be little change in the weather today as a ridge of high pressure remains over California. Maximum temperatures will be around 10 degrees above normal away from the coastal areas, with upper 70s and 80s across the mountains and upper 80s and 90s in the valleys. Minimum humidity will be mainly between 15% and 30% away from the coastal areas, except there will be single digit minimum humidity across the deserts. Winds will be light. A trough moving inland across the Pacific Northwest will bring a little cooling Sunday. This trough will also cause south to west winds of 15 to 25 mph with gusts to 40 mph to surface across the wind prone mountain and desert areas Sunday afternoon and evening. The ridge of high pressure over California will strengthen again causing temperatures to warm back up to around 10 degrees above normal and minimum humidity to drop to 12% to 25% away from the coastal areas Monday through Thursday. Cooling and an increase in humidity will occur Friday through next weekend as a Pacific trough drops down the West Coast. There will be gusty westerly winds across the mountains and deserts Thursday afternoon through next weekend.
